

# NATURAL FIBER PREPREGS

Patented technology for prepreg manufacturing

Eco-friendly natural fiber prepreg manufacturing solution, based on a patented dry impregnation technology.

In-line impregnation and consolidation.

Process possibly used with any type of powder form resins (biobased, thermoplastic, thermoset... )

## APPLICATIONS

■ **Automotive & Transportation**

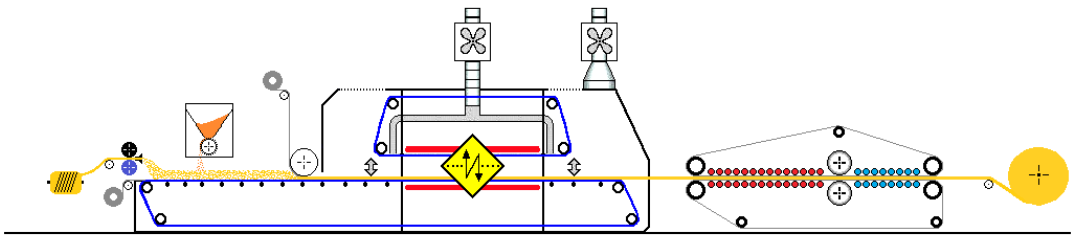

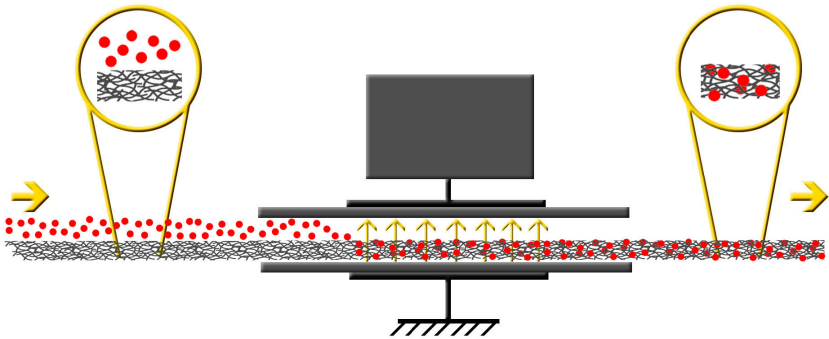

■ **Aeronautic**

■ **Building & Construction**

## A patented technology:

- Large range of resins (PA, PP, PE, PLA, PVC...)
- Perfect binder location
- In line pre-consolidation or consolidation
- Prepregs for sandwich panel construction (with different core materials)
- High performance natural fibers
